The global BBQ Sauces & Rubs market size is expected to reach \$ 14110 million by 2032, rising at a market growth of 5.3% CAGR during the forecast period (2026-2032).

Barbecue sauce (also abbreviated BBQ sauce) is used as a flavoring sauce, a marinade, basting or topping for meat cooked in the barbecue cooking style, including pork or beef ribs and chicken. It is a ubiquitous condiment and is used on many other foods as well.

A 'rub' (also known as a dry rub, spice rub, seasoning rub, dry marinade, BBQ rub, or wet rub/paste when wet) is any mixture of ground spices made for the purpose of being rubbed on meat prior to cooking. Salt and sugar are frequently included in the rub - the salt for flavour and the sugar for caramelisation.

A quick and easy alternative to a marinade, a dry spice rub is applied to meat, fish, or veggies before grilling to add a punch of flavor. Whether it's pork shoulder or a fresh salmon fillet, there's a versatile, one-step spice rub out there that will pump up the volume on your protein of choice.
