BBQ Smokers & Grills are cooking devices that generate low-temperature smoke by burning charcoal, wood pellets, or gas within an enclosed chamber to slowly cook food over extended periods. The core principle involves phenolic compounds and smoke flavoring agents penetrating the food surface, imparting distinctive smoky flavors while achieving low-temperature tenderization that keeps meat juicy and tender. Based on fuel type, they can be categorized as charcoal smokers, pellet smokers, gas smokers, and electric smokers. Products range from residential outdoor grilling scenarios to commercial-grade equipment for restaurants and resorts, serving as an important carrier of outdoor cooking culture and American BBQ traditions.
