## Abstracts

According to our (Global Info Research) latest study, the global Beacon Lights market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A beacon is an intentionally conspicuous device designed to attract attention to a specific location. Beacons can also be combined with semaphoric or other indicators to provide important information, such as the status of an airport, by the color and rotational pattern of its airport beacon, or of pending weather as indicated on a weather beacon mounted at the top of a tall building or similar site. When used in such fashion, beacons can be considered a form of optical telegraphy.

The increasing demand for Beacon Lights drives the market. Increase in disposable income, better attention towards healthcare, and the increasing number of hospitals and health centers, increasing number of military vehicles and emergency vehicles are main factors contributing to the growth of market. Beacon lights are used for informative reasons. Beacon lights when combined with semaphoric or other indicators provide important information such as congestion at airport and weather conditions as displayed on the weather beacon at the top of a building. With the change of climatic conditions, the coming years will witness the development of beacon lights that offer the option to change the intensity of light based on climatic changes. APAC is estimated to be the major revenue contributor to the market by 2021. This is anticipated to boost the growth of Asia Pacific beacon lights market.
