Beacon and strobe light is a high-intensity flashing light used in aviation to provide visual warnings and enhance visibility. The beacon light emits a steady, omnidirectional light signal to indicate the presence of an aircraft or a fixed structure, such as a tower or building. The strobe light, on the other hand, emits intense, rapid, and repetitive flashes of light. Both the beacon and strobe lights are typically mounted on aircraft or structures to improve visibility and help pilots and ground personnel with navigation, collision avoidance, and situational awareness, especially in low visibility conditions.
