Abstracts

Beam fire and smoke detection systems are an excellent option when standard point smoke detectors would be uneconomical to implement, or when large spaces and high rooms would render them too slow to detect fires safely. Using infrared beams directed either straight at detection units, beam detectors can provide effective coverage over large spaces, such as warehouses and factories.

According to our (Global Info Research) latest study, the global Beam Detection Systems market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.
