According to our (Global Info Research) latest study, the global Bearing Ball market size was valued at USD 3226.3 million in 2023 and is forecast to a readjusted size of USD 4532.6 million by 2030 with a CAGR of 5.0% during review period.

Bearing ball is a part used in industrial production, which is a part of bearing. Balls are one of the oldest mechanical devices. They have been used as bearing components on Roman ships as early as 40 AD. At present, people are still constantly developing new design, manufacturing technology and application functions of precision balls. With the development of micro-ball manufacturing technology, the factory has rapidly improved the level of disk drives, dental drills, satellite guidance systems and other important applications.

More than 70% of the world bearing market share is shared by the top ten multinational bearing group companies. Among them, the United States, which accounts for 23% of the global market, 21% of the European Union, and 19% of Japan, are dominated by five companies, such as NSK in Japan, two companies such as SKF in Sweden, FAG in Germany, and several companies such as Timken in the United States.
