Abstracts

Although many people use the word 'duvet' to refer to the duvet cover, technically a duvet is a comforter, usually plain white and filled with down, and a duvet cover is the fabric envelope that fits over the duvet and closes down one side with large buttons, ties, or a zipper. The most popular style of bedding in much of Europe, duvets and their covers have also become very popular in the US over the past decade or two. The duvet cover protects the inner comforter and is easy to remove for laundering, an improvement over traditional comforters and quilts which are generally not easy to wash. In Europe, it is common to use the duvet without a top sheet underneath, but old habits die hard, and most Americans still use a duvet over a top sheet.
