## Abstracts

Bedsores are also known as pressure ulcers, pressure sores, or decubitus ulcers and are mostly found in the aged people and people who spend excessive time on the bed. Bedsores or pressure sores can be prevented and avoided by the support surface devices which mainly includes mattresses, cushions, special overlays, and beds. Bedsores regularly create on skin that spreads bony areas of the body, for example, the heels, lower legs or ankles, hips, and tailbone. Individuals most at danger of bedsores are those with a medical or restorative condition that restricts their capacity to change positions, obliges them to utilize a wheelchair or limits them to a bed for quite a while.
