## Abstracts

The global Belts and Wallets market size is expected to reach \$ 29100 million by 2029, rising at a market growth of 3.8% CAGR during the forecast period (2023-2029).

The considerable demand for belts among working professionals, youth, and ladies is the key factor driving the market. Also, it is anticipated that throughout the forecast period, women's rising demand for fashionable, comfortable, and fancy belts would positively affect the belts market sector.

Manufacturers in the sustainable sector may find attractive business prospects as a result of the increase in demand for leather goods like belts and wallets. The industry has a tremendous chance for expansion as a result of the growing consumer awareness of sustainable and cruelty-free products. Recently, vegan leather and accessories from cruelty-free sources have become more fashionable, especially with the global millennial population.

A wallet is considered to be a daily use product by both men and women to keep one's personal belongings, money, and small travel documents that need to be protected from theft, damage, or weather exposure. The belt mainly functions as a tie, and now it also has aesthetic characteristics.
