## Abstracts

The global Benzaldehyde market size is expected to reach \$ 335 million by 2032, rising at a market growth of 4.3% CAGR during the forecast period (2026-2032).

Benzaldehyde (C<sub>6</sub>H<sub>5</sub>CHO) is an organic compound consisting of a benzene ring with a formyl substituent. It is colorless liquid has a characteristic almond-like odor.

Benzaldehyde is the simplest representative of the aromatic aldehydes. Benzaldehyde is a chemical found in nature in many foods. It is found in cherries, almonds, apricot and peach pits. It is found in nature as the glycoside amygdalin, which is a sugar derivative of the cyanohydrin of benzaldehyde that is found in bitter almonds. In 2025, global Benzaldehyde production reached approximately 100 K MT.

The benzaldehyde market is primarily driven by its strong demand in the flavor and fragrance industry. Benzaldehyde is widely used for its almond-like aroma in food flavorings, beverages, confectionery, personal care products, perfumes, and household fragrance formulations. As consumer demand grows for processed foods, premium fragrances, and scented personal care products, benzaldehyde continues to be an important aromatic ingredient.

Another key driver is its use as an intermediate in pharmaceuticals and agrochemicals. Benzaldehyde is used in the synthesis of various fine chemicals, active pharmaceutical ingredients, pesticides, dyes, and specialty chemical products. The growth of pharmaceutical manufacturing, crop protection chemicals, and custom synthesis activities supports steady demand for benzaldehyde as a versatile building-block chemical.

The market is also supported by expansion in resins, coatings, and other industrial

applications. Benzaldehyde derivatives are used in plastic additives, solvents, corrosion inhibitors, and specialty materials, making it relevant to broader chemical manufacturing. As end-use industries seek functional chemical intermediates for higher-value formulations, benzaldehyde demand is expected to remain stable across both consumer and industrial markets.

This report studies the global Benzaldehyde production, demand, key manufacturers, and key regions.
