Abstracts

The global Benzodiazepine Receptor Agonists market size is expected to reach \$ 1743.3 million by 2029, rising at a market growth of 7.4% CAGR during the forecast period (2023-2029).

The market view for benzodiazepine receptor agonists has shown steady growth due to the high prevalence of conditions such as anxiety disorders, insomnia, and other indications that these medications are used to treat. Factors contributing to the market growth include increasing awareness and diagnosis of mental health disorders, growing geriatric population, and the need for effective treatments for anxiety-related conditions.

Benzodiazepine receptor agonists, also known as benzodiazepines or BZDs, are a class of medications that act on the benzodiazepine receptors in the brain. These receptors are part of the gamma-aminobutyric acid (GABA) neurotransmitter system, which plays a crucial role in regulating neuronal activity and promoting relaxation and sedation.
