According to our (Global Info Research) latest study, the global Benzoxazine Resin market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Benzoxazine resin is a new type of thermosetting resin, because it has no small molecules released during the curing process, the curing shrinkage rate is almost zero, high modulus, high strength, good heat resistance, and low water absorption. Compared with traditional materials, benzoxazine has better thermal, chemical, electrical and mechanical properties, so benzoxazine resin can theoretically be used in most fields where traditional resins can be applied.
