## Abstracts

Beryllium is the lightest alkaline earth metal with atomic number 4. It is relatively rare in the universe. In this report, we just statistic pure beryllium metal.

Scope of the Report:

This report focuses on the Beryllium in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The Beryllium industry concentration is relatively high; there are more very few manufacturers in the world, and high-end products mainly from America. In the world wide, American has a long history and unshakable status in this industry, like Materion Corp. In Kazakhstan, it is Ulba Metallurgical Plant, which leads the technology development. In China, the manufactures are located in Xinjiang and Hunan province. The Beryllium price is easily affected by the downstream demand, especially from Military & aerospace and Nuclear and energy research fields. And this industry is affected by the economy and political policy of the world, so it's important to put an eye to economic indexes and leaders' prefer.

The worldwide market for Beryllium is expected to grow at a CAGR of roughly 4.8% over the next five years, will reach 85 million US\$ in 2023, from 67 million US\$ in 2017, according to a new GIR (Global Info Research) study.
