Abstracts

Biaxially Oriented Polypropylene (BOPP) is a stretched polypropylene film which provides outstanding strength, rigidity, transparency and gloss on top of superior moisture proof properties.

BOPP films are manufactured using a tenter frame sequential process or the double bubble process, in which a polypropylene (PP) film is oriented in two directions (machine and transverse directions). BOPP films are typically used for packaging films, print lamination films, label films etc.

SCOPE OF THE REPORT:

First, the biaxially oriented polypropylene (BOPP) industry concentration is not high. In the world wide, giant manufactures mainly distribute in China. China has a long history and unshakable status in this industry, like China Flexible Packaging Group and FuRong Technology?both have perfect products. In China, the manufacturers focus in Zhejiang, Jiangsu, Fujian province.

Second, all manufacturers in the world are committed to the improvement of product. These two years, some Chinese manufacturers can almost catch up with the world's leading technology too.

Third, the import and export percent of this industry is not high?because some international manufacturers expand their business through building factories or investments.

The worldwide market for Biaxially Oriented Polypropylene (BOPP) is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2024, from xx million US\$ in 2019, according to a new GIR (Global Info Research) study.

This report focuses on the Biaxially Oriented Polypropylene (BOPP) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
