Abstracts

The global Bicycle Brakes market size is expected to reach \$ 1103.4 million by 2029, rising at a market growth of 3.9% CAGR during the forecast period (2023-2029).

Global key players of bicycle brakes include Shimano, Magura, TEKTRO, Campagnolo, SRAM, etc. The top five players hold a share about 67%. Asia-Pacific is the largest market, has a share about 39%, followed by Europe and North America, with share 30% and 28%, separately.

A bicycle brake reduces the speed of a bicycle or prevents it from moving. The three main types are: rim brakes, disc brakes, and drum brakes. Most bicycle brake systems consist of three main components: a mechanism for the rider to apply the brakes, such as brake levers or pedals; a mechanism for transmitting that signal, such as Bowden cables, hydraulic hoses, rods, or the bicycle chain; and the brake mechanism itself, a caliper or drum, to press two or more surfaces together in order to convert, via friction, kinetic energy of the bike and rider into thermal energy to be dissipated.

This report studies the global Bicycle Brakes production, demand, key manufacturers, and key regions.
