The global Bicycle Tire market size is expected to reach \$ 1487 million by 2032, rising at a market growth of 2.1% CAGR during the forecast period (2026-2032).

A bicycle tire is a tire that fits on the wheel of a bicycle, unicycle, tricycle, quadracycle, bicycle trailer, or trailer bike. They may also be used on wheelchairs and hand cycles, especially for racing. Bicycle tires provide an important source of suspension, generate the lateral forces necessary for balancing and turning, and generate the longitudinal forces necessary for propulsion and braking. They are the second largest source, after air drag, of power consumption on a level road. The modern detachable pneumatic bicycle tire contributed to the popularity and eventual dominance of the safety bicycle.

Global Bicycle Tire key players include CHENG SHIN, Continental, etc. Global top two manufacturers hold a share over 50%.

China is the largest market, with a share about 65%, followed by EMEA, and Asia-Pacific, both have a share over 20 percent.

In terms of application, the largest application is City Bicycle, with a share over 50%, followed by Mountain Bicycle, Road Bicycle, etc.
