Abstracts

The global Bifidobacterium Powder market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Bifidobacterium has two, three, four, powder, tablet and capsule. The brands used by children include Mommy Love and Silinkan.

Under normal conditions, the intestinal microorganisms in the human body form a relatively balanced state. Once the balance is damaged, if antibiotics, radiotherapy and chemotherapy are taken, emotional depression, physical weakness, lack of immunity, etc. will lead to the imbalance of intestinal flora. Some intestinal microorganisms, such as Clostridium perfringens, pass through and proliferate in the intestinal tract, and produce amines, hydrogen sulfide, skatole, nitrite, bacteria Toxins and other harmful substances, which further affect the health of the body.

Bifidobacterium is an important intestinal beneficial microorganism. As a physiological probiotics, Bifidobacterium has many important physiological functions for human health, such as biological barrier nutrition, anti-tumor, immune enhancement, improvement of gastrointestinal function, anti-aging and so on.
