Abstracts

The global Bifold Door Hardware market size is expected to reach \$ 1085 million by 2032, rising at a market growth of 3.8% CAGR during the forecast period (2026-2032).

Bifold Door Hardware refers to the hardware components and fitting systems used to install, support, guide, fold, slide, pivot, align, and lock bifold doors. It commonly includes tracks, rollers, pivots, hinges, guides, brackets, handles, locks, seals, and related mounting accessories used in interior closet doors, room dividers, cabinet doors, patio bifold doors, and commercial folding door systems.

In 2025, global Bifold Door Hardware production reached approximately 14,727 K sets, with an average global market price of around US\$ 55 per set.

The upstream supply chain of Bifold Door Hardware mainly includes steel, stainless steel, aluminum alloy, zinc alloy, plastic parts, rubber seals, bearings, rollers, springs, screws, fasteners, surface-treatment materials, and packaging materials. These materials are processed into tracks, hinges, pivots, rollers, guides, brackets, locks, handles, and complete bifold door hardware kits. Downstream customers mainly include door manufacturers, window and door system suppliers, furniture manufacturers, building-material distributors, hardware retailers, contractors, interior decorators, construction companies, and end users, with final applications in residential, commercial, and architectural door systems.

The cost structure of Bifold Door Hardware mainly consists of metal raw materials, rollers and bearings, plastic or nylon guide parts, fasteners, hinges, surface treatment, precision machining, stamping, die-casting, assembly labor, tooling, packaging, logistics, and distribution costs. For basic closet-door hardware kits, metal tracks and

standard fittings account for the main cost; for premium architectural or exterior bifold systems, high-load rollers, corrosion-resistant materials, precision tracks, sealing systems, testing, certification, and brand/distribution costs account for a higher share.

This report studies the global Bifold Door Hardware production, demand, key manufacturers, and key regions.
