## Abstracts

A Big Wheel BMX Bike refers to a specialized type of bicycle designed for the sport of BMX (Bicycle Motocross) riding, featuring a distinctively oversized front wheel and a smaller rear wheel. This design provides the bike with enhanced stability and maneuverability, making it well-suited for performing tricks, jumps, and stunts in various terrains such as dirt tracks, skate parks, or urban environments. The term "Big Wheel" emphasizes the larger diameter of the front wheel compared to traditional BMX bikes, contributing to improved stability at high speeds and increased momentum during jumps. BMX bikes, including those with a Big Wheel configuration, typically have a durable frame, responsive brakes, and robust tires to withstand the demands of aggressive riding styles associated with BMX sports. These bikes are popular among riders who engage in freestyle BMX and street riding, showcasing a combination of strength, agility, and style.
