Abstracts

A bike car rack consists of a set of bars mounted on the roof, hitch or trunk of a car that secures bikes for transportation. While some vehicles include factory-installed car racks, others need to be fitted with aftermarket parts. Since most bike car racks are temporarily fitted, aftermarket parts are used. Vendors are focusing on modern product designs with more features.

Scope of the Report:

This report focuses on the Bike Car Rack in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Recreational activities are main drivers contributing to growth of market. Development of urbanization, hectic lifestyles, over-crowded cities, and rising environmental pollution has encouraged consumer to attend outdoor adventure activities. As people realize the health benefits of outdoor activities, they will participate more in cycling and other recreational activities. Outdoor recreational activities are rapidly gaining popularity in Europe and North America. Changes in lifestyle, attitudes, and demographic are resulting in increased spending on recreational activities. This, in turn, has increased the expenditure on related equipment like bike car racks. Owing to the increased demand for bike-ready vehicles, the car rental company has tripled its fleet to meet the increased demand from cycling fans. The recent rise in the demand for recreational activities during the forecast period.

The worldwide market for Bike Car Rack is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
