Biliary stents are utilized to treat obstruction present in the bile duct.

### Scope of the Report:

This report focuses on the Biliary Stents in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Increase in demand for minimally invasive techniques, technological advancements, and rise in geriatric populations are key drivers for the growth of market. In addition, increase in awareness of the population and rise in demand for bioresorbable stents fuel the market growth.
