The global Bilirubin market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

Bilirubin is a yellow breakdown product of normal heme catabolism, is mainly extracted from animal bile, and is the main pigment in bile. It mainly comes from cattle and pigs. Bilirubin is not only on the human body with detoxification, sedative anticonvulsant, antipyretic, antihypertensive effect , but also to promote red blood cells to improve neonatal immune regeneration. It is the main raw material to manufacture artificial bezoar, or health products, cosmetics, other industries.

Bilirubin is a crystalline powder with color from orange to dark red brown. It is sensitive to light, and becomes dark but no melting by heating. It is soluble in benzene, chloroform, chlorobenzene, carbon disulfide, acid and alkali. It is slightly soluble in ethanol and ether and almost insoluble in water.

Global Bilirubin key players include Hubei Prosperity Galaxy Chemical, Chengdu Tianyuan Natural Product, AnHui Chem-Right Bioengineering, Shaanxi Sciphar Hi-Tech Industry, etc. Global top four manufacturers hold a share over 50%.

China is the largest market, with a share about 50%, followed by Japan, and USA, both have a share about 20 percent.

In terms of product, 95% Bilirubin is the largest segment, with a share about 40%. And in terms of application, the largest application is Artificial Bezoar, followed by Medicine Industrial, etc.
