The global Billiards Tables market size is expected to reach \$ 299 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

A billiard table, billiards table, or pool table is a bounded table on which billiards-type games (cue sports) are played. In the modern era, all billiards tables (whether for carom billiards, pool or snooker) provide a flat surface usually made of quarried slate, that is covered with cloth (usually of a tightly-woven worsted wool called baize), and surrounded by vulcanized rubber cushions, with the whole elevated above the floor. More specific terms are used for specific sports, such as snooker table and pool table, and different-sized billiard balls are used on these table types. An obsolete term is billiard board, used in the 16th and 17th centuries.

Global Billiards Tables key players include Xingpai, Chevillotte, Shender, Brunswick Billiards, Riley, etc. Global top five manufacturers hold a share over 40%. Europe is the largest market, with a share over 40%, followed by China and North America, both have a share over 20 percent. In terms of product, Snooker Billiards is the largest segment, with a share about 40%. And in terms of application, the largest application is Professional Competition, followed by Leisure and Entertainment.
