Abstracts

According to our (Global Info Research) latest study, the global Billiards Teaching Service market size was valued at US\$ 567 million in 2025 and is forecast to a readjusted size of US\$ 875 million by 2032 with a CAGR of 6.4% during review period.

Billiard instruction services refer to the training and guidance provided to individuals or groups by professional coaches, training institutions, billiard academies, or clubs. The core curriculum typically encompasses fundamental elements such as stance, grip, stroke execution, aiming, cue ball positioning, cueing techniques, rules interpretation, practical drills, and the enhancement of competitive psychology and tactics; the ultimate objective is to assist students in improving their striking technique, competitive proficiency, and overall level of billiard expertise.

Billiards teaching services were a niche but important part of the sports and recreational industry. Billiards, which includes various cue sports like pool and snooker, is a popular and enjoyable game played in many countries around the world. Billiards teaching services cater to individuals who want to learn and improve their skills in playing these cue sports. Billiards teaching services constitute a niche market within the broader sports and recreational industry. While billiards is popular, it may not have the same level of participation as more mainstream sports. Billiards teaching services are typically offered by billiards clubs, halls, and recreational facilities that have dedicated billiards tables and equipment.

In recent years, the market has exhibited the following trends: First, the rising popularity of both domestic and international competitions has driven an increased demand for training among the general public and youth. Second, training providers are increasingly

evolving toward an academy-based, facility-centric, and systematic approach, thereby enhancing the overall formalization of the industry. Third, youth training, school partnerships, and the cultivation of reserve talent have emerged as key areas for growth. Fourth, training services are undergoing accelerated integration with event management, cultural and tourism consumption, and smart training technologies, thereby propelling the industry toward greater branding and professionalization.
