According to our (Global Info Research) latest study, the global Bio-Alcohols market size was valued at USD 9143.8 million in 2023 and is forecast to a readjusted size of USD 12320 million by 2030 with a CAGR of 4.4% during review period.

Bioethanol offers higher-octane fuel alternative and is also used for energy oriented applications, such as power generation. Its applications in trucks, buses, airplanes, medical industry, and fuel cells is to lift the growth in the market. The blending of bioethanol with petrol can increase the life span of diminishing oil supplies and ensure greater fuel security globally. Bioethanol is also considered due to its biodegradability and low toxicity than fossil fuels.

Demand for long-term energy security, especially from the emerging countries, and the eco-friendly nature of bio-alcohols are the factors that drive the growth of the market. However, consumption of food grains as feedstock is anticipated to hamper the market growth in the coming years due to increase in population. The volatile prices of crude oil is a major trend expected to create opportunities for bio-alcohols market.
