Bio-based anti-fog agents are environmentally friendly anti-fog materials made from natural or renewable resources (such as plant extracts or biopolymers). Its main function is to prevent water vapor from condensing into fog on transparent surfaces (such as glasses, lenses or car glass) and improve the light transmittance of the surface. Compared with traditional anti-fog agents, bio-based anti-fog agents are more environmentally friendly, biodegradable, and reduce the use of petrochemical raw materials. They are suitable for wide application in daily life and industrial fields.
