Green and bio-based solvents serve as an alternative to the conventional solvents in the market as they help in reducing the negative environmental impact caused from the use of solvents in chemical production. Green and bio-based solvents are produced from renewable resources; they are biodegradable, non-corrosive & non-carcinogenic in nature, recyclable and help prevent ozone depletion.

Scope of the Report:

This report focuses on the Bio-based Solvent in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Easy availability of biofuels, rising environmental awareness and increasing demand for sustainable products are main factors contributing to the growth of market. Rising environmental awareness has increased the preference for bio-based or green solvents over conventional solvents. As these solvents are VOC-free, consumers are not exposed to harmful chemicals. Biofuels are derived from plants or animals and these raw materials are easily available in the market. This offers significant opportunities for the production of biofuel. Moreover, the transportation of biofuels is also much easier than conventional fossil fuels. The rising demand from key application segments such as paints & coatings and adhesives is also expected to propel the market demand over the forecast period. The growing application scope of green & bio-based solvents in the afore mentioned segments can be attributed to the minimal environmental impacts caused by the products, mainly as they are derived from organic and renewable sources. North America would continue to dominate the market through 2020 due to intense awareness among the consumers for the adoption of green solvents and robust

improvement in the U.S. & Mexican construction industry. However, Asia-Pacific will be the fastest growing market and is expected to grow at a CAGR of 6.2% during 2015-2020.

The worldwide market for Bio-based Solvent is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
