According to our (Global Info Research) latest study, the global Bio-based Tackifiers market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Bio-based tackifiers are tackifiers derived from renewable biological resources and are used in adhesive and sealant formulations to increase the viscosity or adhesion of the final product. The substance is usually a solid resin with a low molecular weight and a high softening point, but it also exists in liquid form. It is usually a large proportion of the adhesive formulation content and also occupies a more important position in the cost.
