## Abstracts

Bio-detection has emerged as a solution to the public and governments. With an increase in bio-terrorism, the occurrence of illness and deaths is very frequent. This event is caused by the airborne chemicals or pathogens that are released by a terrorist or a group of people or even by an individual for a motive. These pathogens can be detected by a system called bio-detection, which signals the entry or the existence of a virus.

### Scope of the Report:

This report focuses on the Bio-Detection in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The bio-detection market is being majorly driven due to increasing awareness about bio-terrorism and biological warfare. It is anticipated to propel the demand for bio-detection and drives the global market of bio-detection market. The increasing support from the government to develop effective bio-detection technologies also enhance the growth of bio-detection market over the forecast period. The need for an early detection system for bio-terrorist attack also boost the demand for bio-detection systems. However, the problems faced in the detection of minute pathogens, may hamper the growth of bio-detection market. The increasing misuse of scientific technologies along with increasing circulation of harmful biological agents also restraining the growth of the bio-detection market.

The North America has become the lucrative market for bio-detection and is anticipated to emerge as the fastest growing market due to the rising investments in bio surveillance systems. The Europe is expected to register a significant growth over a

forecast period due to the increase in implementation of highly efficient technologies. APAC region is also expected to register a significant growth in the bio-detection market over a forecast period because the government is trying to prevent these bio attacks and trying to minimize damage caused by these attacks by implementing effective methods.

The worldwide market for Bio-Detection is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
