According to our (Global Info Research) latest study, the global Bio-Ketones market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Bio-ketones are a type of organic compounds which possess important physiological properties which are produced from bio-based raw materials, hereby making it environment-friendly. Bio-ketones are majorly used as solvents in the paint and coating sector, as preservatives, and in hydraulic fluids.

The increasing demand for bio-ketones drives the market. The bio PEEK product type is estimated to account for the largest market share in the global bio-ketones market. PEEK is highly used in the automotive industry as a replacement of metals as it helps in the reduction of automobile, which, in turn, leads to further fuel efficiency. Features, such as increase in performance and weight minimization of in-engine components this coupled with the growth in the automotive industry has made bio PEEK market take a substantial lead in the bio-ketones market. Acetone is widely used as a solvent and denaturant in the cosmetics and personal care industry. Bio acetone is used a renewable alternative to petroleum-based acetone. Asia-Pacific dominated the bio-ketones market in 2017 due to the cheap labor and cost.

The Global Info Research report includes an overview of the development of the Bio-Ketones industry chain, the market status of Automobile (Bio MEK, Bio PEEK), Aerospace (Bio MEK, Bio PEEK), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Bio-Ketones.
