Abstracts

Bio-ketones are a type of organic compounds which possess important physiological properties which are produced from bio-based raw materials, hereby making it environment-friendly. Bio-ketones are majorly used as solvents in the paint and coating sector, as preservatives, and in hydraulic fluids.

Scope of the Report:

This report focuses on the Bio-Ketones in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The increasing demand for bio-ketones drives the market. The bio PEEK product type is estimated to account for the largest market share in the global bio-ketones market. PEEK is highly used in the automotive industry as a replacement of metals as it helps in the reduction of automobile, which, in turn, leads to further fuel efficiency. Features, such as increase in performance and weight minimization of in-engine components this coupled with the growth in the automotive industry has made bio PEEK market take a substantial lead in the bio-ketones market. Acetone is widely used as a solvent and denaturant in the cosmetics and personal care industry. Bio acetone is used a renewable alternative to petroleum-based acetone. Asia-Pacific dominated the bio-ketones market in 2017 due to the cheap labor and cost. The worldwide market for Bio-Ketones is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
