Vanillin is a phenolic aldehyde, which is an organic compound with the molecular formula $C_8H_8O_3$. Its functional groups include aldehyde, hydroxyl, and ether. It is the primary component of the extract of the vanilla bean. Synthetic vanillin is now used more often than natural vanilla extract as a flavoring agent in foods, beverages, and pharmaceuticals.

Scope of the Report:

This report focuses on the Bio Vanillin in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Popularity of bio vanillin in premium foods and perfumes may stimulate the industry. The product's ability to mask bitter taste and infuse a pleasant flavor to medicines and foods could add to market demand. Support from food regulatory bodies in Europe and the United States (the FDA) may prove beneficial for market progress. Customer awareness regarding health and regulatory norms that discourage the use of synthetic products will encourage growth. Moreover, widespread acceptance of bio vanillin can strengthen demand during the forecast period. This product exhibits minimal side effects on human health and offers a pleasant fragrance. These factors are expected to fuel the industry in the long run.

APAC, led by food & beverages growth in China & India, was the dominant regional industry for synthetic vanillin market and accounts for over 40% of the overall demand in 2015. Rising consumption accompanied by less regulatory norms as compared to other regions are key stimulating factors. LATAM, led by Brazil is likely to witness significant gains in synthetic vanillin market share with over 7.2% CAGR up to 2023. Middle East,

led by growth in confectionaries and ice cream industry growth in GCC region, may witness above average industry gains over the foreseeable timeframe. The worldwide market for Bio Vanillin is expected to grow at a CAGR of roughly 12.8% over the next five years, will reach 310 million US\$ in 2023, from 150 million US\$ in 2017, according to a new GIR (Global Info Research) study.
