Abstracts

Bioactive proteins are protein fragments that impact the physiological and functional activities of the body. These proteins are anti-oxidative, anti-hypersensitive, anti-microbial, and anti-thrombotic. The global bioactive protein market is a key segment of the global dietary supplement market. Dietary supplements complement the normal diet. They enhance digestive health, bone health, cardiovascular health, immune function, blood pressure, and help in weight loss. Bioactive proteins have an extensive range of functional, nutritional, and biological functions. The most important roles of bioactive proteins are to increase the nutritional value and enhance bioactivity.

Scope of the Report:

This report focuses on the Bioactive Protein in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The increasing consumer concerns over healthy diet is expected to boost the market for functional foods which in turn will drive the market for bioactive protein. Another prominent factor driving the market demand is the higher percentage of aged people and also the increase in the incidence of chronic diseases. The restraining element of the bioactive proteins market is the adverse effects these compounds have on human health, such as biogenic amines (tyramine and histamine), causing allergies, hypertensive crises, and headache. North America will be the major revenue contributor to the bioactive protein industry owing to the growing demand for bioactive protein products for food and beverage and nutraceutical applications. The growing consumer awareness about the advantages of nutraceuticals and their medical advantages, will be a major factor driving the growth of the bioactive protein market in North America.

The worldwide market for Bioactive Protein is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
