Abstracts

The global Bioceramics and Hydroxyapatite market size is expected to reach \$ 1023 million by 2032, rising at a market growth of 7.6% CAGR during the forecast period (2026-2032).

With the increasing number of the dental and orthopedic implants, demand for the bioceramics continues to remain high among the manufacturers. As bioceramics continue to remain an important component in the production of the dental and orthopedic implants they are also known as medical ceramics. Aluminum oxide, zirconia, calcium phosphate (tricalcium phosphate, hydroxyapatite) and bioglass are witnessed to be the most commonly used bioceramics. These are mostly oxides, carbides or nitrides based and have excellent biocompatibility.

Global core manufacturers of Bioceramics and Hydroxyapatite include Shandong Sinocera, Functional Materials, CAM Bioceramics, Tosoh, Daiichi Kigenso Kagaku Kogyo (DKK) and Kyocera. Asia-Pacific is the largest consumption region, accounting for approximately 36% of the global market, followed by North America. In terms of product type, zirconia is the largest market segment, with a share of more than 45%. In terms of application, the largest application is orthopaedic, with a share of approximately 58%.
