According to our (Global Info Research) latest study, the global Biocides and Disinfectants market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Biocides and disinfectants are chemicals or physical agents that are used to inhibit the growth of pathogenic microorganisms. They are used to kill harmful organisms and resist bacteria and fungus. These chemicals help eliminate suspended substances or impurities from contaminated water, thereby making it suitable for domestic and industrial uses.

One of the major drivers for this market is Increasing population and rising demand for clean water. Rising population across the globe increases the demand for clean water, which drives the global biocides and disinfectants market. It is estimated that the global population will increase by around 35% during 2015-2050, which will increase the demand for water by more than 50%. By 2050, the global population will reach 9.2 billion. A majority of the current population does not have access to clean water.
