Abstracts

Biocides and disinfectants are chemicals or physical agents that are used to inhibit the growth of pathogenic microorganisms. They are used to kill harmful organisms and resist bacteria and fungus. These chemicals help eliminate suspended substances or impurities from contaminated water, thereby making it suitable for domestic and industrial uses.

Scope of the Report:

This report focuses on the Biocides and Disinfectants in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. One of the major drivers for this market is Increasing population and rising demand for clean water. Rising population across the globe increases the demand for clean water, which drives the global biocides and disinfectants market. It is estimated that the global population will increase by around 35% during 2015-2050, which will increase the demand for water by more than 50%. By 2050, the global population will reach 9.2 billion. A majority of the current population does not have access to clean water. The latest trend gaining momentum in the market is Increasing focus on research and development (R&D). Players in the market invest heavily in the R&D of biocides and disinfectants and introduce products with enhanced functionalities and improved efficiency. These products help in waste water treatment. Development of new varieties of biocides and disinfectants drives market growth. The market is highly price sensitive, and the key players offer product differentiation through innovations. In the present scenario, a large number of players focus on innovations that improve quality and reduce the cost of production. The vendors have developed technologies and solutions

that have led to an increase in the number of patents.

APAC is witnessing a rapid increase in the demand for water treatment chemicals due to the rising consumer awareness and stringent global environmental biocidal products regulations on water preservation and management. This will drive the demand for biocides and disinfectants for water disinfection during the forecasted period.

Furthermore, the availability of cheap labor in India, China, Indonesia, and Malaysia are attracting global market players.

The worldwide market for Biocides and Disinfectants is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
