Transparent Biodegradable Cellophane Tape: The backing material of this product is called "cellulose film" which is a kind of natural materials. Cellulose film is made from cotton pulp or wood paddle as raw material and regenerated cellulose membrane after special processing. It is different from ordinary paper. It is not only flexible, but also transparent, just like glass, so it is called 'cellophane'. It is different from ordinary paper. It is not only flexible, but also transparent, just like glass, so it is called 'cellophane'. Environmental friendly pressure-sensitive glue, both biodegradable and water-based, is emulsified with butyl acrylate, water, rosin resin and additives. It can be biodegraded into water and carbon dioxide, and can be recycled together with waste cartons. It can be colored as required, such as white, red, blue, coffee, beige, etc. it can print various logos and customize different specifications as required. The product uses precision printing equipment. The printing color is bright and lifelike. The trademark pasted on the carton is very eye-catching and beautiful.
