Abstracts

Loose fill packaging materials offer cost-effective protection to lightweight products against vibration or shock during handling or shipping. This packaging material is flexible and therefore, fills the empty spaces in the outer packaging. It is most widely used to fill the empty space around the fragile goods in the cardboard boxes, in order to ensure safe delivery of products during shipping.

According to our (Global Info Research) latest study, the global Biodegradable Loose Fill Packaging market size was valued at USD 198.6 million in 2022 and is forecast to a readjusted size of USD 320.6 million by 2029 with a CAGR of 7.1% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Furthermore, biodegradable loose fill, also known as peanuts, is majorly used in the protection of valuable items such as electronic components, fragile consumer products, and glass items. This packaging material has the ability to dissipate static charge and therefore, is used in the packaging of microchips and electronic products that are susceptible to damage due to static electricity.
