Abstracts

Biodegradable polymers are the degradable inorganic molecules. They can be either natural or synthetic and can be made of either ester, amide or ether. They find use in many industries such as pharmaceuticals, agriculture, packaging etc.

Scope of the Report:

This report focuses on the Biodegradable Polymers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. One of the key factors driving the growth of this market is the rise in enhanced consumer appeal to eco-friendly packaging. As consumer focus is changing towards healthier living, the demand for a natural, sustainable, and green product is also increasing. This shift in consumer behavior has compelled the major plastics manufacturers and packaging vendors to explore the possibilities of biodegradable polymers. Moreover, the need to conform with government regulations is forcing vendors to focus on manufacturing biodegradable polymers and promote the products that have sustainable components in the export market. It has also been observed that consumers prefer sustainable options for plastic bags and food packaging. The leaders in the global biodegradable polymers market are North America and Asia Pacific that includes China and Japan. Owing to consumer awareness regarding the use of renewable polymers, Europe has emerged as the leading market for biodegradable polymers. North America is expected to grow considerably during the forecast period, due to the consumer shift and rising crude oil prices. The report mentions that during the forecast horizon, Asia Pacific is estimated to witness rapid growth, with countries such as China and Japan evolving as major markets for biodegradable polymers.

The worldwide market for Biodegradable Polymers is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
