According to our (Global Info Research) latest study, the global Biodegradable Stern Tube Lubricant market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Biodegradable stern tube lubricant is a type of lubricant specifically designed for in the stern tubes of ships or marine vessels. The stern tube is a hollow tube that connects the ship's engine room to the propeller, allowing the drive shaft to transmit power to the propeller. Traditional stern tube lubricants are usually based on mineral, which can have negative environmental impacts if leaked or accidentally discharged into water bodies. Biodegradable stern tube lubricants, on the other hand, are formulated using biodegradable base oils and additives that are less harmful to the environment.
