Abstracts

Lubricants are liquid agents that smoothen the movement of various moving parts of a vehicle. They are made up of base oils and performance-enhancing additives that help reduce friction in automotive components such as gear boxes and engines.

Scope of the Report:

This report focuses on the Biolubricant in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Environmental and toxicity issues of conventional lubricants coupled with rising cost due to shortage and poor biodegradability have led to huge interest in the improvement of eco-friendly lubricants. Increasing supply of high-performing, cost-effective green oils in the framework of government regulations is predicted to drive bio-lubricants market growth. Furthermore, various industry players are mostly focusing on developing novel green formulations for various end users, which is expected to upsurge the industry growth. However, the high cost of bio-lubricants along with lack of acceptance in underdeveloped countries may hamper the bio-lubricants market. Nevertheless, growing use of bio-lubricants in the automotive industry is expected to provide a wide scope for the bio-lubricants industry over the forecast period. The Americas held the majority of the market share due favorable regulatory policies and an increased demand from the automotive as well as industrial sector. The report includes an in-depth analysis of the key regions and the forecast of the market shares by 2019. BRICS nations are expected to register the highest growth rate owing to rapid industrialization. A significant increase in the industrial demand for bio-lubricants is expected to emanate from emerging economies during the forecast period.

The worldwide market for Biolubricant is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
