Omics, proteomics, meta-bolomics technologies are used in biomarkers discovery and disease diagnosis. Biomarkers are used in risk assessment, molecular diagnostic, disease diagnosis, DNA fingerprinting and other molecular applications. Biomarkers enable pharmaceutical companies to analyze and discover novel drugs as demand for cost effective and efficient treatment dose is increasing. Biomarkers are used in drug validation and testing, sample preparation and assay development to eliminate complexity in discovery and development of novel drugs. Biomarkers of disease are used in identification of disease condition and also help in validation of clinical trials for novel drug.

According to our (Global Info Research) latest study, the global Biomarker of Disease market size was valued at US\$ 28550 million in 2023 and is forecast to a readjusted size of USD 79120 million by 2030 with a CAGR of 15.5% during review period.

According to the Global Use of Medicines 2023 released by IQVIA Institute, the global drug expenditure in 2022 was about US\$1.48 trillion (excluding COVID vaccine and treatment-related expenses), and it is predicted to grow at a rate of 3%-6% in the next few years. In terms of drug expenditure, this number in China was about 166 billion dollars in 2022. It is expected that the expenditure on medicines will increase in the next few years. From the perspective of demand, the trend of population aging, the increase of residents' wealth and the improvement of health awareness will drive the demand for medicines.

Global Use of Medicines 2023 shows that the U.S. market spent about US\$ 62.9 billion on medicines in 2022 on a net ex-factory basis. Overall growth slows as the Inflation

Reduction Act (IRA) spends US\$64 billion to reduce prescription drug prices, and the adoption of new treatments is expected to increase over the next few years. Besides, ex-factory discounts and rebates in drug distribution, the impact of patent expiration, and generic or biosimilar competition will also affect the U.S. pharmaceutical market.
