Abstracts

Biometric technology uses human physical attributes as locks and keys, making it particularly suitable for access control systems on the buildings of large organisations. Using biometrics for security and identification requires meeting two challenges: they must be cheap enough and sufficiently simple to be used by ordinary users. Furthermore, for enhanced security, these biometric access control systems should combine two or more types of authentication, such as coupling fingerprints with key codes or passwords to provide greater trust that who is logging in is only who is expected to do so.

Scope of the Report:

This report studies the Biometric Access Control Systems market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Biometric Access Control Systems market by product type and applications/end industries. The shift from non-biometrics technologies such as PINs and smart cards for controlling access to secure premises drives the growth of the biometric access control systems market. Some biometric technologies such as fingerprint and iris recognition are being used for the same. Since these biometric technologies are cost-effective and user-friendly, integration of access control systems with these biometric technologies is expected to provide significant traction to the market during the forecast period. Currently, the North America and Europe regions are experiencing higher adoption of biometric access control systems across BFSI and government sectors. APAC, Latin America, and MEA are also expected to increase their adoption during the forecast period. The transportation and healthcare sectors are likely to emerge as one of the

biggest adopters of biometric systems during the same period.

The global Biometric Access Control Systems market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Biometric Access Control Systems.
