Biometrics systems help in identifying and verifying a person based on his/her physical or behavioral traits. A biometric system offers an advantage over the traditional bar code or ID systems - Traits of an individual, also known as biometrics factors can never be lost or stolen. There are various biometrics solutions in the market. Some of them are iris recognition, facial recognition, fingerprint recognition, palm vein recognition, and signature recognition solutions. Among these, the fingerprinting technology holds the largest market share.

The rising acceptance of biometrics systems among students to be one of the primary growth factors for the biometrics market in the education sector. Biometrics system primarily records the physical or behavioral characteristics and then converts it into computer codes to be stored in a database for future verification. Biometrics in education institutes prevents unauthorized use of data, unauthorized access to the premises, and error in attendance monitoring. This enables the efficient tracking of students, which will consequently increase their acceptance among educational institutions.

The Global Info Research report includes an overview of the development of the Biometrics in Education industry chain, the market status of K-12 (Fingerprinting, Iris), Higher Education (Fingerprinting, Iris), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market
