Abstracts

Biopellet or pellet fuels are made up from biofuels made from biomass. Pellets are made up of any five general categories of biomass which includes agricultural residues, energy crops, food waste and virgin lumber.

SCOPE OF THE REPORT:

This report focuses on the Biopellets in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. They are a kind of solid fuel and have a uniform energy content, size, shape, moisture, and density. Biopellets are manufacturing using biomass types such as bark and sawdust. The widely deployed methods of manufacturing biopellets includes stages which are compressing, drying, pulverizing, and then molding biomass in pellets of cylindrical shape.

The worldwide market for Biopellets is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
