Abstracts

The global Biopharmaceutical Logistic market size is expected to reach \$ 127620 million by 2032, rising at a market growth of 3.8% CAGR during the forecast period (2026-2032).

Biopharmaceutical Logistics is the logistics of Biopharmaceutical, medical and surgical supplies, and other products needed to support doctors, nurses, and other health and dental care providers. Because it's final customers are responsible for the lives and health of their patients, medical logistics is unique in that it seeks to optimize effectiveness rather than efficiency. Medical logistics functions comprise an important part of the health care system: after staff costs, medical supplies are the single most expensive component of health care. To drive costs out of the health-care sector, medical logistics providers are adopting supply chain management theories.

Market competition is intense. Deutsche Post DHL, Kuehne + Nagel, FedEx, AmerisourceBergen, UPS (Marken) and DB Schenker, etc. are the leaders of the industry, and they hold key technologies, with high-end customers; have been formed in the monopoly position in the industry. The top six players got about 20% market shares. North America is the largest consumption place, with a consumption market share nearly 34%. Following North America, Europe is the second largest consumption place with the consumption market share of 30%.
