Abstracts

The global Biorepository Storage Service market size is expected to reach $ 1364 million by 2032, rising at a market growth of 9.2% CAGR during the forecast period (2026-2032).

Biorepository Storage Service refers to professional services that provide storage, temperature-controlled preservation, inventory management, and quality assurance for biospecimens used in life science research, clinical trials, medical testing, biopharmaceutical development, and biobank operations. The service typically covers blood, serum, plasma, urine, saliva, tissue, cells, nucleic acids, microbial samples, and other clinical or research specimens. By using different storage conditions such as ambient, refrigerated, frozen, ultra-low temperature, or liquid nitrogen storage, together with processes including sample receipt, labeling, aliquoting, accessioning, retrieval, logistics coordination, environmental monitoring, information tracking, and compliance documentation, the service helps ensure sample stability, traceability, and usability throughout the storage period.

Biorepository Storage Service is a fundamental enabling service in life science research, clinical trials, precision medicine, and biopharmaceutical development. Market demand is mainly driven by the growing need of pharmaceutical companies, CROs, medical institutions, research institutes, diagnostic companies, and biobanks for long-term sample stability, standardized management, and compliant traceability. With the development of multicenter clinical studies, translational medicine, genetic testing, companion diagnostics, and real-world research, biospecimens are becoming more diverse, larger in volume, and more closely linked to clinical and research data. This raises higher requirements for temperature control, sample integrity, information management, quality systems, and cross-regional service capabilities. Overall, the

market is evolving from basic frozen storage toward integrated biospecimen management services covering sample receipt, processing, aliquoting, cryopreservation, inventory management, quality control, data management, and regulatory support. Professional service providers with standardized operations and long-term service experience are better positioned to gain recognition from pharmaceutical and clinical research customers.

This report studies the global Biorepository Storage Service demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Biorepository Storage Service, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Biorepository Storage Service that contribute to its increasing demand across many markets.

Highlights and key features of the study
Global Biorepository Storage Service total market, 2021-2032, (USD Million)
Global Biorepository Storage Service total market by region & country, CAGR, 2021-2032, (USD Million)
U.S. VS China: Biorepository Storage Service total market, key domestic companies, and share, (USD Million)
Global Biorepository Storage Service revenue by player, revenue and market share 2021-2026, (USD Million)
Global Biorepository Storage Service total market by Type, CAGR, 2021-2032, (USD Million)
Global Biorepository Storage Service total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Biorepository Storage Service market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Thermo Fisher Scientific, IQVIA, Labcorp, Eurofins, Merck, Quest Diagnostics, ICON, Charles River Laboratories, EPL Archives (VWR), Precision for Medicine, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.
