The global Biostimulants market size is expected to reach \$ 3876.2 million by 2029, rising at a market growth of 7.3% CAGR during the forecast period (2023-2029).

Global key producers of biostimulants include Biolchim, Valagro, Isagro, SICIT Group and others. The top four manufacturers together hold about 10% of the market share, with the largest manufacturer being Biolchim. global origins are mainly in North America, Europe, China, India, etc., with Europe being the largest production region with 43% of the market share. In terms of product category, plant extract biostimulants are the largest segment with about 50% market share, followed by humic and fulvic acids with 30% share. In terms of its applications, fruits and vegetables are its top application area with a market share of more than 50%.

Biostimulants include acid-based biostimulants, plant extract biostimulants and others.

Agricultural biostimulants include diverse formulations of compounds, substances and other products that are applied to plants or soils to regulate and enhance the crop's physiological processes, thus making them more efficient. Biostimulants act on plant physiology through different pathways than nutrients to improve crop vigour, yields, quality and post-harvest shelf life/conservation.
