Bipolar disorder, also known as manic-depressive disorder, is a mental illness. It is a mental health problem that primarily affects mood. Symptoms of bipolar disorder are extreme irritability or agitation, a period of feeling empty, loss of interest in normal activities, sleep problems, etc. According to Pfizer, Inc., bipolar disorder affects over 5 million people in the U.S. Bipolar episodes are characterized by a drastic change in behavior and mood, and range from joyful and overexcited (manic episodes) to extremely sad and hopeless (depressive state). These disorders have different types of episodes such as manic episodes, hypomanic episodes, depressive episodes, and mixed episodes. Causes of bipolar disorders include childhood trauma, stressful life events, self-esteem problems, and genetic inheritance. People across the world marked "March 30" as a World Bipolar Day to spread awareness about the disorder and erase the stigma of mental illness. Large number of people suffering from this mental condition resort to drinking to lift their mood. According to the National Institute on Alcohol Abuse and Alcoholism, 27.6% of the people with bipolar disorder become addicted to alcohol, while over 16% engaged in alcohol abuse.
