Abstracts

According to our (Global Info Research) latest study, the global Bisphenol A Polyether Polyol market size was valued at US\$ 139 million in 2025 and is forecast to a readjusted size of US\$ 190 million by 2032 with a CAGR of 4.6% during review period.

In 2025, global sales volume of bisphenol A polyether polyol was approximately 29,000 tons, with the mainstream enterprise-end average price at about USD 4,650 per ton. The gross margin of major manufacturers was approximately 25%~38%.

Bisphenol A polyether polyol is a type of aromatic polyether polyol produced by using bisphenol A as the initiator and carrying out addition reaction with ethylene oxide, propylene oxide, or a combination of both. Its molecular structure contains both the rigid aromatic ring structure of bisphenol A and flexible polyether segments, with terminal hydroxyl groups generally retained, allowing further reaction with isocyanate, epoxy resin, acid anhydride, acrylate, and other systems. Compared with ordinary aliphatic polyether polyol, bisphenol A polyether polyol places greater emphasis on resin compatibility, adhesion, water resistance, chemical resistance, mechanical strength, and thermal stability. Common product types include ethoxylated type, propoxylated type, and ethoxylated/propoxylated type.

Its upstream raw materials mainly include bisphenol A, ethylene oxide, propylene oxide, catalysts, and refining auxiliaries. Downstream, it is mainly used in coating, adhesive, sealant, elastomer, resin modification, UV-curable material, electronic material, and other fields. This product is not a bulk foam-grade raw material like ordinary polyether polyol, nor is it the same as bisphenol A epoxy resin. Instead, it is more positioned as a functional polyether intermediate and specialty resin modification raw material. Its main

value lies in improving rigidity, heat resistance, and bonding performance through the bisphenol A backbone, while enhancing flexibility, processability, and system compatibility through the polyether segments.
